

A Quick Introduction To Oracle-X

Congratulations you are now the proud owner of an unique and easy to use intuition tool based on a deck format. Oracle-X is non-prescriptive, and works on a number of levels, allowing you to use it in various ways for a variety of purposes.

Suitable for both left and right brained people, the tool is designed to mould itself to the way you think and how you use and interpret your intuition. No belief in anything except your intuition is required.

Your new deck is guaranteed 100% unique, it contains a combination of cards which will never be found exactly in that unique combination in any other sealed brand new deck.

Oracle-X has been designed from the onset to be both customisable and expandable. This allows you, as the owner of your deck, to shape it exactly the way your intuition is guiding you. This unique feature allows you to customise your deck when *and if you want*. New cards can be added to the base set as required, allowing you to build a deck uniquely personal to yourself and your own personal circumstances.

David, our Oracle-X creator, incorporated over 3 decades of his own experience into the overall concept and high level design. Each base deck contains **36** cards designed to be easily read straight out of the box. Oracle-X features durable poker sized cards, allowing those with smaller sized hands to easily shuffle without feeling uncomfortable, therefore less likely to be dropped.

In a departure from conventional oracle decks, every base deck is totally unique when purchased. This will assist you in making that special bond between yourself and your deck. We want you to feel a personal connection with this deck. For it is truly a tool that can grow and change in conjunction with its owner.

Only you know how you will ultimately customise this deck; please turn to the back of this sheet for more details of how your unique deck is made up.

A Brief Overview Of The Cards

Each unique Base Deck contains **36** different cards, and each Oracle-X card features:

- An Identification Number** (e.g. 101)
- A Keyword** (e.g. a framed mirror)
- An Illustration** (e.g. a framed mirror)
- A 'Grid'** (coloured primary theme/purpose)
- Four 'Runes'** (in 1, 2, 3, or 4 colours)

Card Identification Number

Each card has a unique 3 digit number, this serves as a quick card reference. The 1st digit represents the 'series' to which the card belongs. The 2nd & 3rd digits cards represent the numerical sequence within that series. For example; card 101 (Mirror) is the 1st card of series 1.

The 'Grid'

The front of each card has a single coloured 'grid'. The colour of the 'grid' indicates the primary theme/purpose of that card, serving as a useful optional guide for new Oracle-X owners.

If used in conjunction with the 'runes' the grid has a value (score) of 16, but more of this later.

Each colour represents a loose theme or purpose and can help position the meaning of a card within a reading. The possible colours are as follows:

Purple	General (no specific theme/purpose)
Red	Roles (e.g. Doctor)
Yellow	Time (e.g. seasons)
Green	Animal/Nature Connection
Orange	Symbolic
White	Colour/Chakra
Dark Blue	Western Astrology
Light Green	Numerology
Light Blue	Universal
Grey	Chinese Zodiac
Light Yellow	Mayan Zodiac
Brown	Questioning
Black	TBN
Pink	Relationships *

* love, family, close friends, and anyone who currently spends a lot of time in/near your body space (energy field)

Keyword/Illustration

Each card features a single (*primary*) keyword for which your intuition in conjunction with the card illustration, will bring forth thoughts, images, impressions etc. These are the most important aspects of the card and assist driving the 'roadmap' by which the reading progresses onward.

The *primary* keyword should drive the output, however, at times when nothing seems to 'fit' or 'flow', each card has a further 7 *secondary* keywords (details of which can be found on the reverse of this insert). If you need help with the *primary* keyword, refer to the *secondary* keywords and use the word(s) that seems to 'jump out' or 'feel' right for you to use.

If your intuition interprets the card in an entirely different way, this is not a problem (after all it is your intuition!) as Oracle-X supplies a 'blank' to allow an 8th *secondary* keyword based on your personal

interpretation. When used your 'new' additional word(s) should be read in conjunction with the existing *primary* and *secondary* keywords.

This is your deck and you are free to customise in this or any other way.

For most users a combination of the keyword(s) and illustration allows easy access to your intuition, with each reading you can become increasingly confident, and consequently your skills will grow more focused and relevant.

The Four 'Runes'

Underneath each image are four 'runes' which represent the cards secondary themes/purposes. The colours correspond to those in column two. The difference is that as these are the *secondary* purpose/themes of the card. They serve as a 'guide' for those who might need them, and they do not have to be used (100% optional).

A card displaying four purple coloured 'runes' is general (i.e. no specific secondary theme/purpose). Each card can have one primary theme/purpose and up to four different *secondary* theme/purposes.

The positioning of the 'runes' is relevant, and can be used to determine the strength of each theme and/or purpose. The strength of each *secondary* theme/purpose can be calculated easily by adding together the value (score) of each rune based on its position. From the left the values are 8; 4; 2; 1.

For example, a yellow (i.e. time) 'rune' in the outer left position would score 8, and a red (i.e. role) 'rune' in the inner left position would score 4. Thus, 'time' would be a far more important secondary consideration than that of 'role'.

Each card can have up to 4 different coloured 'runes' and by using the scoring guide above, the strongest theme/purpose can be discovered.

A card might have 2, 3, or 4 'runes' of the same colour. Multiple 'runes' used in this way reinforce the overall strength of one or more themes/purposes. For example, if the outer left and inner right 'runes' are both yellow, and the inner left and outer right are both pink: yellow is worth 10 (8+2), and pink is worth 5 (4+1), indicating 'time' is the most relevant *secondary* consideration followed by 'relationships'. If a card displayed 4 pink 'runes', this would represent a score of (8+4+2+1), indicating a very strong *secondary* theme/purpose.

Finally, if one or more of the 'runes' are the same colour as the 'grid', this strengthens the primary theme/purpose. Since the value of the primary theme/purpose (i.e. the grid) is worth a score of 16. e.g. if the card has a yellow 'grid', and if the two left

side 'runes' were also yellow this gives score of 28 (16+8+4). Hence 'time' is a highly important consideration with that card.

The highest possible score is 31 (16+8+4+2+1) and only used in the case of a card with a single theme/purpose.

If this all seems rather complicated, then you do not need to use it, it is merely provided as a guide for those whose mind works in that way (logical), or for those still finding their way with the deck.

How Many Times Should I Shuffle My Deck?

Well, as many or as few as you feel comfortable with. It is not the amount of shuffling one does but the energy that is put into them. Sometimes, the mere fact of holding the deck for three to four minutes before a simple shuffle is quite sufficient. While you are holding the cards, focus upon the reason for which you are using the cards for.

How Can I Prepare Myself To Give A Reading With Oracle-X?

Abstaining from alcohol, smoking, coffee, tea, etc., for the previous 24 hour period will certainly help, as well as reducing or removing consumption of heavy and/or gassy foods. A good nights rest the previous day also gives value. How far you are prepared to go is entirely down to yourself and personal circumstances. The more you are able to do, the easier it will be to pick up the finer vibrational energies and to tune in to your intuition.

For clothing, light cotton garments will make your body feel lighter and more comfortable. Again this is down to personal preference; the importance here is that you can give your reading without worry of distraction. e.g. fabric itching, sweating, constant fidgeting, or having to re-adjust items.

The setting of the reading is important, the room temperature should be neither too warm nor too cold, any partners, children, pets, or other distractions should be migrated to another room. Mobiles must be set to silent or better still turned off. If there is background noise that cannot be removed, consider playing an instrumental CD quietly in the background. New World Music CD's are particularly recommended.

The mood and vibration of your room can be enhanced in a number of ways. You might like to use scents, such as the lighting of an incense stick/cone, the setting up an oil burner, or even an ultrasonic diffuser if you have one. Some of you might prefer to use a singing bowl prior to commencement of the reading, or a musical instrument of some kind. Or if

you find silence itself a distraction, to have some instrumental music as background.

Card Layouts (Spreads)

Most existing spreads can be used, or adapted to use with Oracle-X cards. You can layout your Oracle-X cards using your favourite spread, or visit our website where we provide an extensive range of spreads suitable for many common situations.

If you wish to give yourself a quick 'Daily Headline' for yourself, then after you have shuffled the cards, cut the deck, discard the first card, and lay out the subsequent two cards face up alongside each other:

Card 1: Today's opportunity or challenge
Card 2: Influenced by

As you look at the cards, their images and primary keywords try and cut out your day to day logical consciousness. Allow yourself to link deep into your subconscious to awaken your inner intuition. With a little practice this will become as easy as ABC, and once learnt, never forgotten. You will gradually feel a growing and deeper inner understanding, an awareness that brings forth a different aspect when considering the daily grind of life. The more you use Oracle-X the easier it will become to 'tune in'.

More complex spreads allow you to use your new Oracle-X deck in other ways. For example, you could try this spread which can assist you in determining an answer to a (one) specific question. We call this the 'Smile' Spread:

- Card 1:** Past influences
- Card 2:** Present circumstances
- Card 3:** General future conditions
- Card 4:** Best course of action to follow
- Card 5:** Attitudes and opinions of others
- Card 6:** Possible obstacles hindering resolution
- Card 7:** {a/the} likely final outcome

This spread can be used for yourself, or when you are reading for another person (aka the querent).

Look at the cards in relation to each other as the meanings of some cards are heightened or lessened by their position to each other.

Sometimes a card simply feels 'right' or feels 'wrong' for no apparent reason. Just follow and let your intuition guide you.

What If I Cannot Understand A Given Oracle-X Card?

Look at the card solidly for 30 seconds then close your eyes, and visualise that card in your minds eye. Even if you are in a reading with another individual, try not to feel pressured, instead just relax and wait for your inner self to respond.

If this does not work for you, then examine the 7 secondary keywords listed for that card, and select the one that 'seems to fit best'. If you have created an '8th' keyword, this should be included with the original 7 secondary keywords.

If you are still at a blank, then ask the person you are reading for, what that card means for them, this should help reactivate your intuition.

Naturally, you should resist any 'urge' to repeat the reading if it does not seem to make sense, or gives you an answer you do not like. As frequently the 'penny will drop' later in the day and it will make sense after all.

Do I Need To Add Any More O-X Cards?

No, just only if you want to; the base deck is perfectly adequate for you to conduct most types of readings. Expanding your unique deck is an optional activity and therefore totally down to you. We shall be adding more cards from Oracle-X 'library' list over the coming seasons. You can keep in touch with the latest and newest cards and other developments by regularly logging on to our website.

Our Website

Why not visit our 'carbon offset' website which contains more help with detailed instructions for use, latest news, tips, spreads, FAQ's, an Oracle-X user forum, and of course our online store for you to purchase any additional Oracle-X cards to enhance and customise your personal deck. Items are post free [within UK] if you spend over £5.00.
