welcome stability

hot and cold

re-bond

listens

Overall Usage

The primary and secondary keywords of each card should be used in conjunction with that card's primary and secondary theme/purpose, and these in turn with the imagery. Using a combination of these allows your intuition the flexibility to respond on a variety of levels.

Use Of Secondary Keywords

The secondary keywords are normally used when the primary keyword does not seems to fit or lacks sufficient flow or feeling. For each card there are at least seven secondary keywords. By carefully looking at all seven keywords that represent the particular card, try and find which seem to resonate, 'jumps out' at you, or 'feels' the right one to use. If more than one feels right you can use both, or a mix of both.

Customisation

If your intuition is giving you another word or word(s), then you can customise your deck by adding that word into the space provided against each card. This now gives you an eighth secondary keyword to use alongside those supplied. Thereafter you can use all eight secondary keywords.

Expansion

While Oracle-X is ready to use out of the box, like with any new tool, it can take a short time to become familiar with how it works best for you. As you grow in confidence you might decide to expand your deck by purchasing additional cards. New cards are expected to be available regularly and you will be able to acquire just those individual cards that you intuitively feel will complement your deck and add increased depth to your readings.

How Your Unique 36 Card Oracle-X Deck Is Made Up

Your unique deck is guaranteed to contain all 30 cards listed in the upper section. That is all those numbered between 101 to 130.

The remaining 6 cards are taken from the listing in the lower section. That is from those numbered between 131 to 154.

This is your unique 36 card deck.
